SKILLS

Programming Languages:	Python (Pandas, NumPy, SciPy, Matplotlib)
Databases:	SQL Server, MySQL, PostgreSQL
BI & Visualization Tools:	Power BI, Tableau, MS Excel (Pivot Tables, VLookup, Conditional Formatting)
Cloud & Data Services:	Microsoft Azure (DataBricks, Data Lake, Data Warehouse)
Core Competencies:	Business Intelligence, Data Storytelling, Reporting Efficiency, Stakeholder Management, Data Integrity
Languages:	English (Native), Spanish (Native)

WORK EXPERIENCE

Vida Software SAC Lima, Peru
Data Analyst November 2024 - May 2026

- Designed complex SQL queries to analyze historical sales trends against inventory levels, automating restocking alerts and reducing supply chain reaction time by 30% and improved inventory decision-making for procurement teams.
- Engineered Python scripts and Azure Data Factory pipelines to enhance business intelligence, ingesting high-volume sales transaction data into SQL Server to improve visibility into demand fluctuations by 25% and drive strategic business outcomes.
- Implemented data integrity initiatives within Azure Synapse Analytics, achieving 100% validation accuracy for Master Data (SKUs, Vendors) and leveraging active stakeholder management to support reliable demand forecasting.
- Applied data storytelling to build interactive Sales vs. Stock dashboards, partnering closely with business stakeholders to track KPIs (Sell-Through Rate, DSI) and optimize reporting efficiency.

Luz del Sur SAA Lima, Peru
IT Audit Intern/IT Audit Trainee Oct 2022 - November 2024

- Analyzed 10,000+ financial records using Excel and Caseware IDEA to identify irregularities in petty cash and vendor invoicing, driving tangible business outcomes through process improvements that mitigated financial risk.
- Created automation scripts for audit testing procedures, resulting in significant time saved by reducing manual data validation efforts by 20% and improving overall financial workflows.
- Exercised strong stakeholder management by mapping audit workflows and data dependencies alongside senior auditors, boosting cross-functional team efficiency for recurring audits.
- Designed and deployed 20+ interactive Power BI dashboards, enhancing reporting efficiency and empowering stakeholders to identify financial anomalies 15% faster to drive quicker corrective decision-making.

PROJECTS

Sales & Sentiment Analytics | [GitHub](#)

- Engineered a robust ETL pipeline using Python (Pandas, Regex) to clean, normalize, and process 1,000+ unstructured e-commerce records, standardizing complex hierarchical categories for advanced business intelligence analysis.
- Formulated complex SQL scripts utilizing Window Functions and CTEs to extract actionable business insights, identifying high-margin pricing strategies, "best value" product segments, and primary revenue drivers.
- Applied advanced data storytelling principles to design an interactive Power BI dashboard featuring custom DAX measures; visualized key business outcomes such as Discount Sensitivity and Customer Sentiment to guide targeted stakeholder marketing strategies.

Python & SQL Automation Solutions for Sales & Inventory Data | [GitHub](#)

- Engineered automated ETL scripts leveraging Python and SQL to parse and load daily Modern Trade sales records. Eliminated manual data entry, saving 15+ hours weekly, reducing error rates, and guaranteeing data integrity for executive reporting.
- Developed an automated Python reporting tool to track daily data warehouse updates. Generated automated HTML email alerts detailing processed date ranges and total valued sales per distributor, providing stakeholders with immediate visibility into pipeline health and boosting reporting efficiency.

EDUCATION

Universidad Peruana de Ciencias Aplicadas, Lima, Peru
Professional title in systems engineering

July 2025

CERTIFICATIONS & COURSES

- Google, Coursera: Advanced Data Analytics Specialization
- Google, Coursera: Business Intelligence Specialization
- Google, Coursera: Project Management Specialization
- Microsoft, Coursera: Business Analytics Specialization
- Microsoft, Coursera: SQL Server Specialization
- IBM, Coursera: IT Scrum Master Specialization
- Databricks Academy: Databricks Fundamentals Accreditation
- Universidad Nacional de Ingeniería: Basic Algorithms & Data Structures Course
- Cambridge English: ECPE (C2 Proficiency)
- IDAT: Python for Data Analysts Course
