SKILLS

Technical Skills: Python (Pandas, NumPy), SQL Server, MySQL, PostgreSQL, Power BI, Tableau, Excel (Pivot Tables, XLookup, Conditional Formatting), Azure (Databricks, Data Lake, Data Factory), ChatGPT, Claude Code

Competencies: Business Intelligence, Data Storytelling, Stakeholder Management

Languages: English & Spanish (Native)

WORK EXPERIENCE

Vida Software SAC

Lima, Peru

Data Analyst

November 2024 - May 2026

- Designed SQL queries to analyze sales and inventory, automating replenishment alerts that reduced supply chain reaction time by 30% and optimized purchasing decisions.
- Automated data ingestion into SQL Server using Python and Azure Data Factory, increasing demand visibility by 25% for BI strategies.
- Implemented data integrity initiatives in Azure Synapse Analytics, achieving 100% accuracy in Master Data (SKUs, Vendors) to support reliable demand forecasting.
- Designed interactive Sales vs. Stock dashboards applying data storytelling to track KPIs (Sell-Through Rate, DSI) and optimize reporting with stakeholders.

Luz del Sur SAA

Lima, Peru

IT Audit Intern/IT Audit Trainee

Oct 2022 - November 2024

- Analyzed over 10,000 financial records using Excel and audit software to identify irregularities in petty cash and vendor billing, driving tangible business outcomes through process improvements that mitigated financial risk.
- Developed automation scripts for audit testing procedures, reducing manual data validation efforts by 20% and improving overall financial workflows.
- Designed and implemented over 20 interactive Power BI dashboards, improving reporting efficiency and empowering stakeholders to identify financial anomalies 15% faster, enabling agile corrective decision-making.

PROJECTS

Sales & Sentiment Analytics | [GitHub](#)

- Developed an ETL pipeline (Python, Pandas, Regex) and advanced SQL queries (CTEs, Window Functions) to process 1,000+ records and identify high-margin pricing strategies.
- Designed an interactive Power BI dashboard (DAX) visualizing Discount Sensitivity and Customer Sentiment to guide marketing strategies.

Python & SQL Automation Solutions for Sales & Inventory Data | [GitHub](#)

- Automated daily sales data ingestion (Python, SQL), saving 15 hours per week, reducing errors by 25%, and ensuring data integrity.
- Created a daily HTML email alert system to notify stakeholders about the data warehouse status and consolidated sales, streamlining the reporting workflow.

EDUCATION

Universidad Peruana de Ciencias Aplicadas, Lima, Peru

July 2025

Professional title in systems engineering

Universidad Peruana de Ciencias Aplicadas, Lima, Peru

December 2023

Bachelor's degree in systems engineering

CERTIFICATIONS & COURSES

- Google, Coursera: Advanced Data Analytics Specialization
- IBM, Coursera: IT Scrum Master Specialization
- Microsoft: Azure Data Fundamentals (DP-900)
- Databricks Academy: Databricks Fundamentals Accreditation
- Cambridge English: ECPE (C2 Proficiency)
- IDAT: Python for Data Analysts Course
